

The Exinda 2060

Unified Performance Management for Small Branch Offices

The Exinda 2060

Designed for small branch offices, the 2060 model expands to support up to 20 Mbps worth of traffic and up to 50 users.

The Challenge

Everyday more and more data is being pushed across our networks. Increased growth and reliance of web based applications, VoIP, streaming video and Internet usage have congested our networks and made them unreliable. Network users are spending more and more time waiting at screen (TWAS) as applications compete for finite resources over stressed, over-run networks. This proliferation of traffic has degraded our networks' speed and performance and resulted in productivity losses.

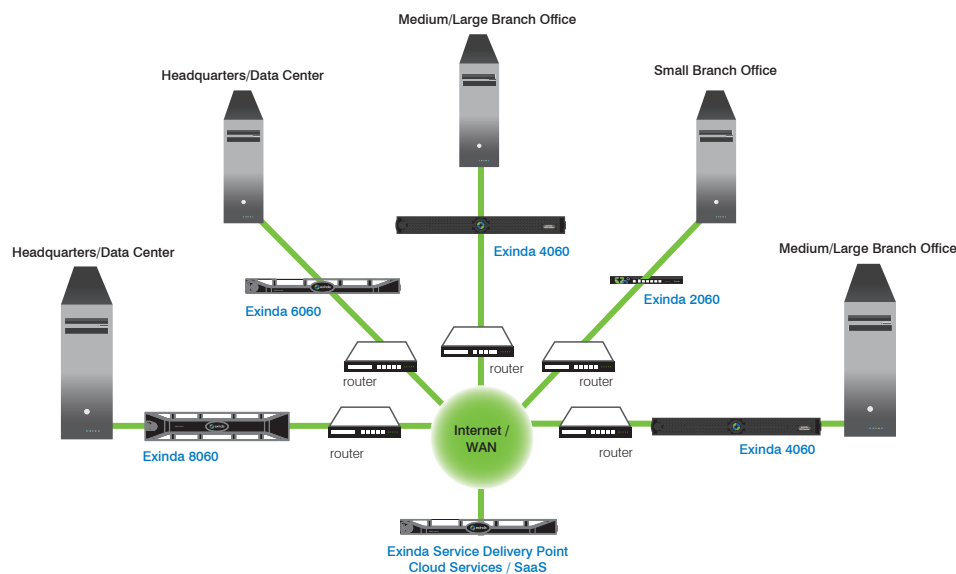

The challenge faced by IT professionals today, is how to gain visibility into the network, identify what applications and users are causing the congestion and put policies in place to ensure applications and data run smoothly over your network, despite the ever-increasing demand?

The Solution

Exinda provide users with the best network experience possible by maximizing the speed and efficiency of applications over the network.

Exinda's unified performance management (UPM) solution brings together a suite of advanced, best-of-breed, visibility, traffic-shaping and WAN optimization technologies into a single, easy to-use appliance designed to improve network productivity.

Exinda is the only unified performance management solution on the market. Controlled through a seamlessly integrated, unified management console, Exinda reduces costs, increases revenue and allows you to get the most out of your network.

Features & Benefits

Visibility

Provides insight into network activity, usage and performance. Gives you the information you need to keep your network operating at peak performance

- Layer 7 Classification
- Heuristic Classification
- URL Classification
- Drill Down Capabilities
- Real Time Monitoring
- Top Talkers/Top Conversations
- Active Directory User ID
- Anonymous Proxy Detection
- Application Response Time
- Service Level Agreements
- Citrix Published Applications
- Automated PDF Reporting

Control

Maximize network resources to the needs of your organization through comprehensive control over network traffic without placing heavy-handed restrictions on users.

- QoS / Dynamic per IP User
- Bandwidth Management
- Traffic-shaping
- Prioritization
- Active Directory Integration

Optimization

Rapidly, turn understanding into action that drives network performance, improves the user experience, and optimizes productivity.

- Layer 4 TCP Optimization
- Layer 7 Application Acceleration
- Universal Caching
- Compression
- Intelligent Acceleration
- Peer Auto-Discovery

Exinda 2060 Hardware Specifications

Form Factor	19" 1U rack mount
Dimensions	431 x 44 x 277 mm, 17" x 1.7" x 10.9"
Weight	5 kg / 11 lb
CPU	1GHz Celeron
RAM	2GB
HDD	160GB
Data Store / Cache Size	112GB
NICs (default)	5 x 10/100/1000
NICs (expandable to)	not expandable
Bridges/Bypass Pairs (default)	2
Bridges/Bypass Pairs (expandable to)	not expandable
Interface NIC Slots	not expandable
Console	1 x COM Port (RJ-45)
Power Supply Type	Internal
Power Rating	Single power supply (150W), Auto Ranging (100V~240V)
Environment	0-40C, storage temp 20-80C relative humidity 0-90% (non-condensing)
Approvals	CE,FCC, Certified/RoHS

Software Specifications

Licensed Bandwidth (full duplex)	x700 Software Visibility & Control			x800 Software x700 with Optimization		
	2	10	20	1	2	6
Max. Device Throughput (Mbps)	1,000	1,000	1,000	1,000	1,000	1,000
Max. Concurrent Flows	32,000	32,000	32,000	32,000	32,000	32,000
Max. L7 New Connection Rate	30	30	30	30	30	30
Reports (PDF)	4	4	4	4	4	4
SLAs	10	10	20	10	10	20
ARM Objects	2	5	5	2	5	5
Policies	64	128	128	64	128	128
Accelerated Connections				100	150	250
WAN Optimization (Mbps)				1	2	6
Max WAN Shaped/QoS(Gbps)				10	10	20
Disk Size (GB)				160	160	160
Data Storage (GB)				120	120	120

About Exinda ®

Exinda is a proven global supplier of WAN Optimization and Traffic Shaping products. The company has helped over 1,500 organizations in 80 countries worldwide to reduce network operating costs and ensure consistent application performance over the WAN. The Exinda Unified Performance Management (UPM) solution encompasses application visibility, control, optimization and intelligent acceleration – all within a single network appliance that is affordable and easy to manage.
